PURPOSE:

The RGGI states are continuing the 2012 program review called for in the RGGI Memorandum of Understanding (MOU). Program review is a comprehensive evaluation that is part of the RGGI states' continued commitment to the environmental integrity of the RGGI program and the long-term development of the RGGI market.

To support program review, this meeting will solicit stakeholder input on IPM electricity sector modeling. The states are seeking stakeholder comment on 2012 updates to the assumptions used for the IPM Reference Case and sensitivity analyses. The modeling, along with other information to be gathered throughout 2012, would be considered to support evaluation of any potential modifications to the RGGI program.
